
WIZ − ECA, composite features (H_Shannon, H_Renyi, H_Tsallis: lower; others: upper; rolling 182−day percentiles)
Blue: eruptions E1−E5 (line = onset, band = eruptive period) Grey bands: precursor window of the best setting (dT weeks, ending tau weeks before each onset)
Orange dashed: left out of the test, grey dotted: not treated as eruptions (N1 2012−09−01 to 12−31, B1 2013−01−01 to 04−10, N2 2016−09−13)
Red: rows beyond the best threshold (dark = inside a precursor window) Dashed: the four percentile thresholds (bold = best)
WIZ RSAM (10−minute values, log scale): black = daily median, grey = daily maximum
Eruptions counted (UTC, scenario 'definite'): E1 2012−08−04, E2 2013−08−19, E3 2013−10−04 to 10−11, E4 2016−04−27, E5 2019−12−09
